TECHNICAL CHARACTERISTICS
1. APPLICATION
   This specification applies to the Ni-Cd batteries
   Model : 100K

2. CELL AND TYPE
   2.1 Cell : Sealed Ni-Cd Button Cell
   2.2 Type : Button type
   2.3 Size type : 1.2V

3. RATINGS
   3.1 Nominal voltage : 1.2V
   3.2 Nominal capacity : 100mAh/0.2CmA
   3.3 Typical weight : 4.0g
   3.4 Standard charge : 10mA×14hours
   3.5 Rapid charge : 20mA×6hours
       Trickle current : 3mA
   3.6 Discharge cut-off voltage: 1.0V
   3.7 Temperature range for operation (Humidity: Max.85%)
       Standard charge 0～+45℃
       Rapid charge +10～+45℃
       Trickle charge 0～+45℃
       Discharge -10～+45℃
   3.8 Temperature range for storage (Humidity: Max.85%)
       Within 2 years -20～+35℃
       Within 6 months -20～+45℃
       Within a month -20～+45℃
       Within a week -20～+55℃

4. ASSEMBLY & DIMENSIONS
   Per attached drawing

5. PERFORMANCE
5.1 TEST CONDITIONS
The test is carried out with new batteries (within a month after delivery) under ambient conditions:

- Temperature: +25±5°C
- Humidity: 60±20%

Note 1
- Standard charge: 10mA×14 hours
- Standard discharge: 0.2C to 1.0V

5.2 TEST METHOD & PERFORMANCE

50 cycles of test as in the following table condition is repeated. The discharge time of the 100th, 200th, 400th, 500th is more than 5 hours. (Ambient temperature is 20±5°C)

5.3 Humidity

The battery shall not leak during the 14 days which it is submitted to the condition of a temperature of 33±3°C and a relative humidity of 80±5%.

6. OTHERS

6.1 We recommend you to set the cut-off voltage at 1.0V/cell.
6.2 If the cut-off voltage is above 1.1V/cell, the battery may be underutilized resulting in insufficient use of the available capacity.
6.3 If it is below 1.0V/cell, the battery may have discharge or reverse charge to the cell.

7. PRECAUTION

The cells shall be delivered in charged condition. Before testing or using, the cell shall be...
discharged at 20±5℃ at a constant current of 0.2CmA to a final voltage of 1.0V/cell.

7.1 Avoid throwing cells into a fire or attempting to disassemble them.
7.2 Avoid short circuiting the cells.
7.3 Avoid direct solidarity to cells.
7.4 Observe correct polarity when connecting.
7.5 Do not charge with more than our specified current.
7.6 Use cells only within the specified working temperature range.
7.7 Store cells in dry and cool place.
