GermKick door opener

GermKick hands-free door opener, made in the USA
Spreading disease is a modern-day problem. It deserves a modern-day approach. The GermKick is a foot operated door handle that allows a swinging door to be opened hands-free. It is the attractive and affordable public restroom hardware to fit the modern world. GermKick is made of a very durable polypropylene co-polymer blend that is soft enough to protect shoes, and durable enough to last for years.

Colors available: Grey, Black, Red, & Safety Orange.
